

Making it in NSW

Investment NSW

Lisa Emerson MSc
Modern Manufacturing
Commissioner

NSW Modern Manufacturing Commissioner

To develop and implement a strategy to grow manufacturing in NSW.

Why NSW

The case for growth

Strategic
location

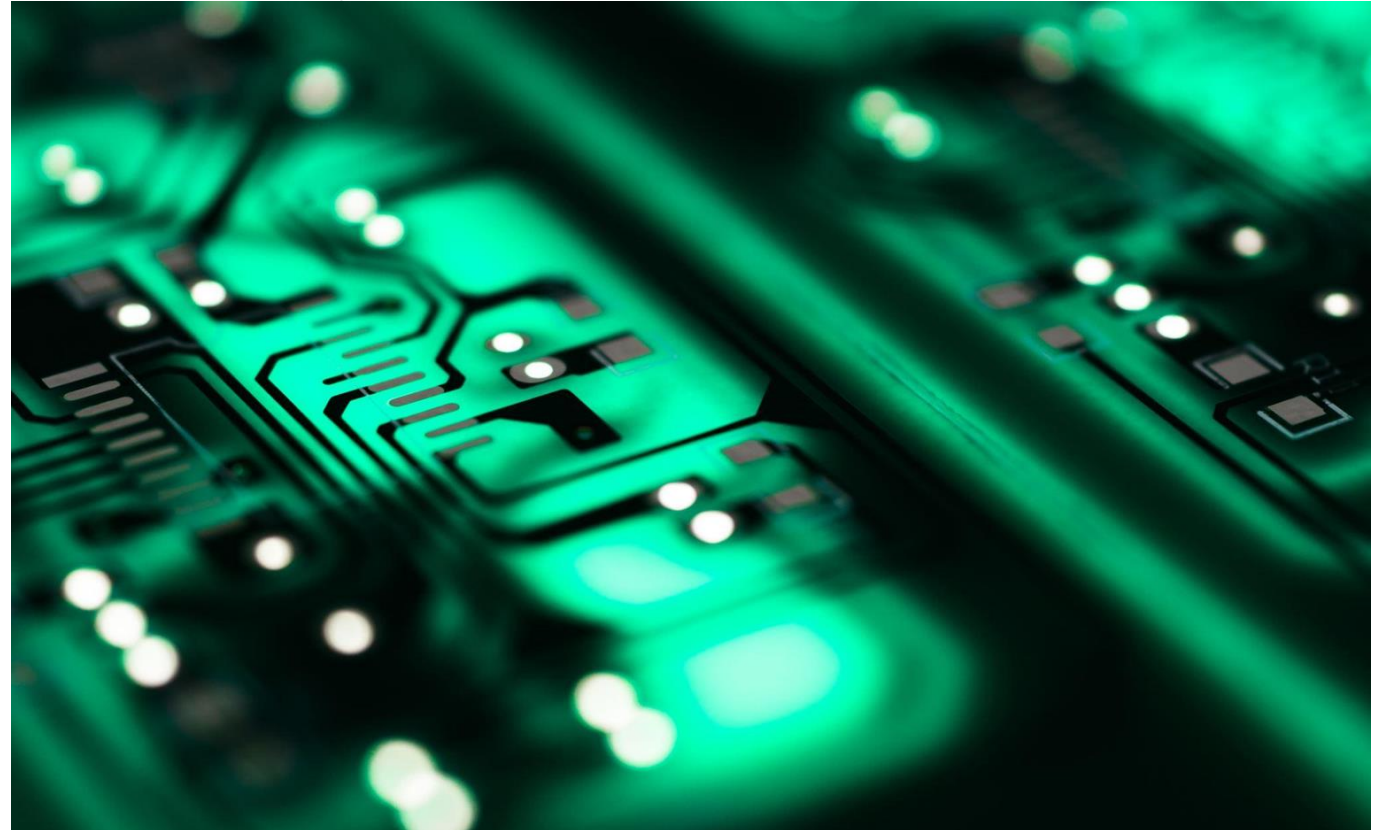

Highly
educated
workforce

Entrepreneurial
and innovative

Globally
renowned
universities

World class
natural
resources

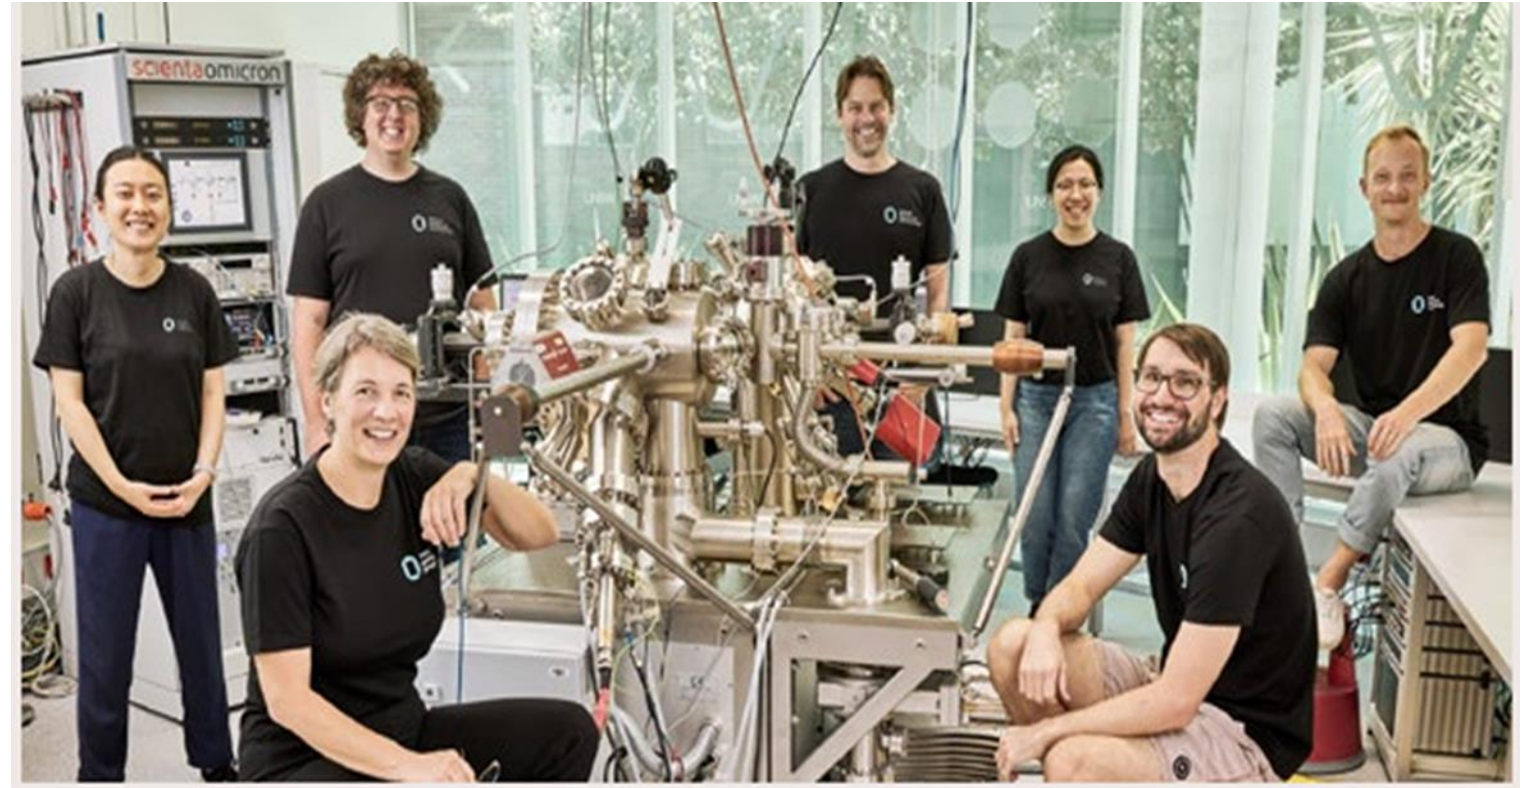

Significant
customer base

Modern manufacturing sits at the centre of NSW's future economy, bringing together both traditional skills and emerging technologies

Australia's leading manufacturing state

Professor Michelle Simmons (bottom left) and the Silicon Quantum Computing team with an atomic scale integrated circuit in Sydney.

NSW Modern Manufacturing Strategy

An image depicting what Sydney's state-of-the-art Advanced Manufacturing Research Facility (AMRF) will look like.

Strengthening local research, collaboration and partnerships between government, research institutions and industry.

Modern Manufacturing Taskforce Report

Key themes

A coordinated approach

Structured collaboration

Promotion including new entrepreneurial ventures

New approach to public procurement

Targeted business support

Enhanced cooperation and integration

Coordinated support for skills and training
